Introducing the Vertical Farm

One of London’s biggest commercial indoor vertical farms, developed by Harvest London. Providing locally grown produce directly to the Main Space while supplying restaurants across London, with a mission to build a sustainable, hyper-local food system.

At Corner Corner, we farm in a controlled environment, providing our crops with the exact mix of light, water, nutrients and humidity that they need to thrive. This allows us to grow produce year-round, with no pesticides, reducing waste at every step.

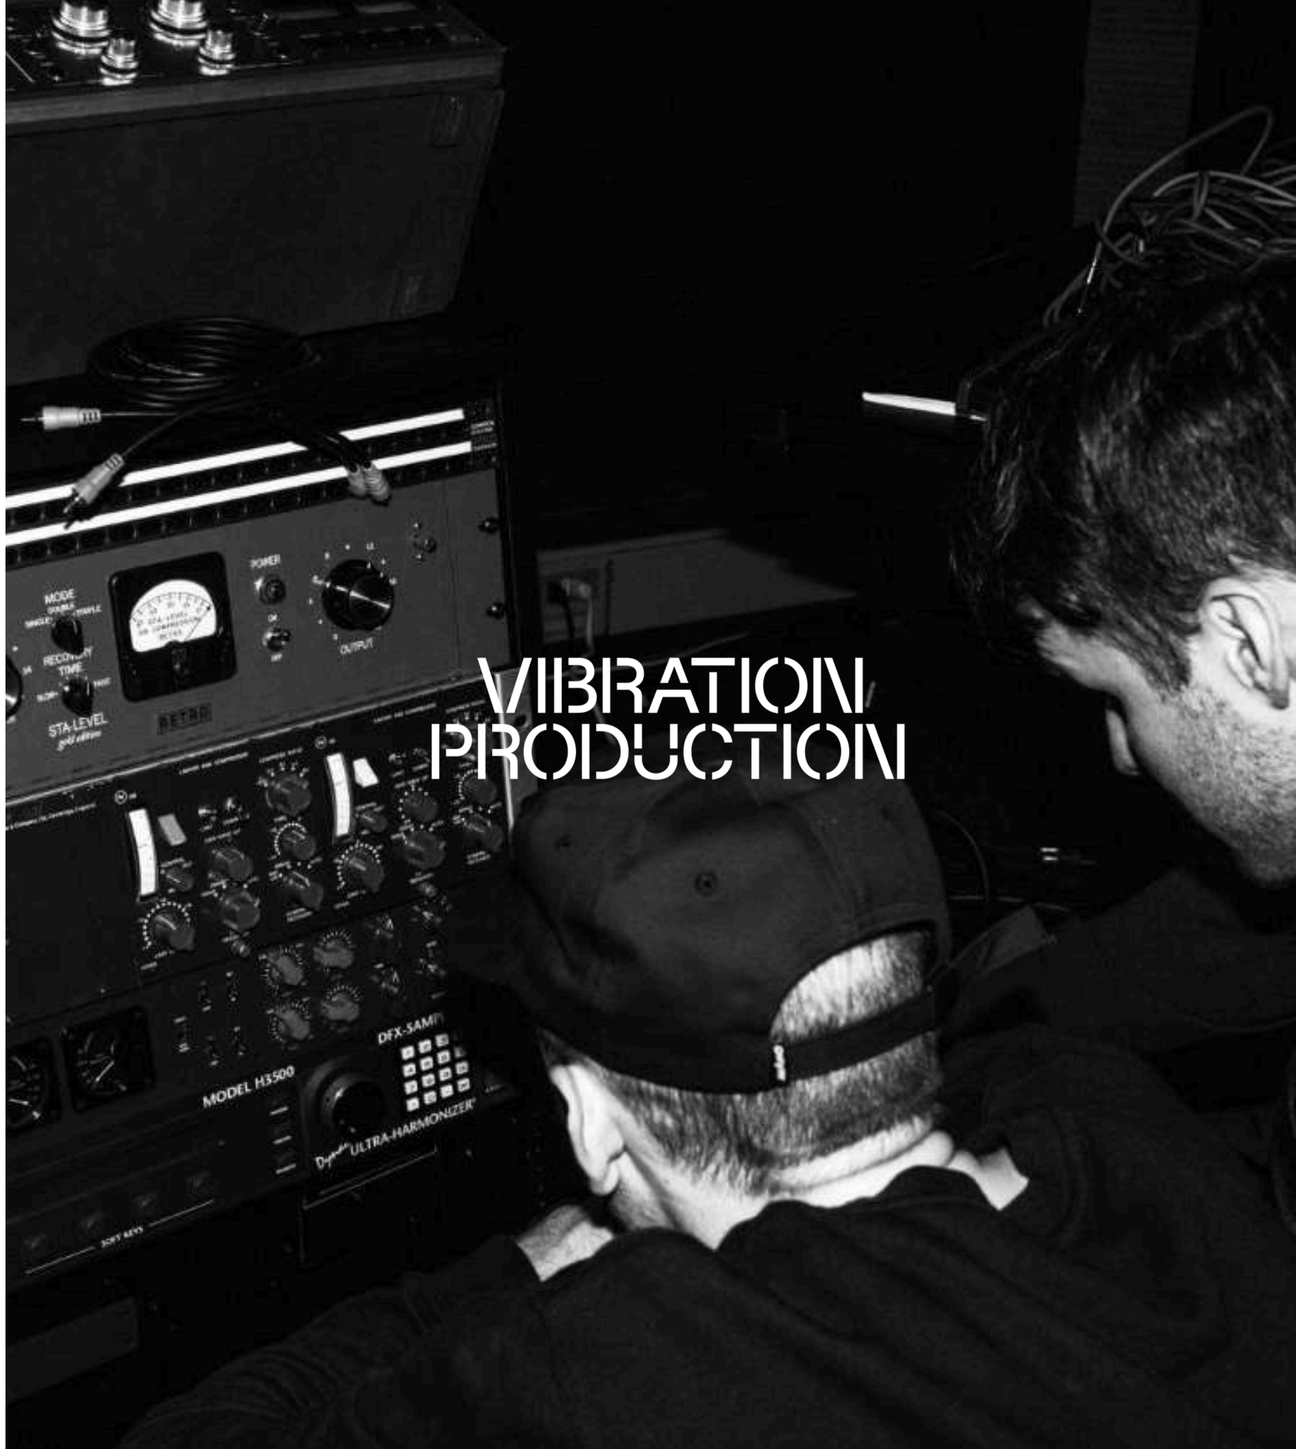

Enhance your event and include a farm tour and allow your guests to see where their food is coming from first hand, with ingredients going from farm to customer in just four hours.

In-house production

Vibration Production is our exclusive in-house production partner, supporting all event production requirements.

Corner Corner is equipped with high-spec permanent audio, lighting, and AV systems that accommodate everything from conferences and live bands to panel talks while remaining discreet and cohesive with the venue’s natural, industrial aesthetic.

With extensive expertise in technical production, decor, furniture hire, and total show management, Vibration Production ensures events run smoothly from concept to delivery.
